31N1930

WG1, This communication contains meeting and BRM announcements with logistics information. We are nearing completion of our work for this phase of document support. I hope to have the Toulouse meeting report and document status soon. In the meantime:

Plantation meeting announcement

At its first Plenary (11-13 March 1997), SC31 agreed to the formation of Working Groups to progress work on the JTC1 approved projects. Among those groups is WG1: Data Carrier.

I extend an invitation to all National Body Members and Experts to attend the nineteenth WG1 meeting on 11 January 2006 in Plantation, FL, USA. The meeting will be from 9A to 6P. I respectfully request that NBs notify the SC31 Secretariat of the authorized meeting participants prior to the meeting.

The meeting will be held at the Renaissance Ft. Lauderdale Plantation Hotel, 1230 South Pine Island Road, Plantation, FL 33324, 9544722252. The agenda will accompany the Toulouse meeting report.

The room rate is \$158.00 with free high-speed internet. The reason the room rate is so high is because there is a very low conference room and catering fee which should be less than \$20 for the day. In addition, all hotel meals are discounted 20%. To make reservations, call the hotel and ask for the "ANSI MH10" rate. The reservation cut-off date is 12 December 2005.

There is no free shuttle from the Ft. Lauderdale airport to the hotel. A taxi is approximately \$25 and a group shuttle is \$15. If you have a car, hotel parking is free. There is, however, a free hotel shuttle going back to the airport and for short trips near the hotel.

For your information, at the same venue during the week of 9 to 13 January, there will be meetings of WG3, AIM TSC and MH10, including a joint meeting of all three focusing on DPM quality measurement. You are invited to all of them, with the caveat that participation at the WG3 meeting needs to be through a National Body or Liaison Group.

BRM announcement

On 11 January 2006 at the same venue as the nineteenth meeting of WG1, the following BRM will be held:

2P to 3P: ISO/IEC 16022 Data Matrix

Ballot comments will be circulated shortly after the close of voting on 8 October 2005.
