### Convenor's Report - SC31/WG3 to SC31 2008 Toronto, Canada Plenary

#### 1. Summary

WG3's work program continues to progress and expand. Since the last Plenary report two of WG3's documents have had Technical Corrigendums published and others continue the 5 year maintenance review process. New work has begun on ISO/IEC 29133 "Quality Test Specification for Rewritable Hybrid Media Data Carriers." The gloss/opacity and direct part marking guideline TR's have been published since the last plenary. Work progresses nicely on the RFID conformance/performance projects in WG3 SG1. Mr. Josef Preishuber-Pfögl (Austria) has continued as our convenor of SG1.

#### 2. Work program status

WG3/SG1 has participants from the same countries plus Australia, Austria, Canada, China, France, Israel, Korea, Netherlands, Russia, Singapore, Sweden, Switzerland, and South Africa.

#### 4. Meetings

The main WG and its sub-group have each held three formal meetings since the last Plenary.

The committee reviewed the documents that it has open for 5 year review as well as the need for new project editors for a number of documents. A general presentation regarding a new work item on Rewritable Hybrid Media was given by the Japanese delegation. There was a discussion about lowering the tolerances in ISO/IEC 15421, "Bar Code Master Test Specifications", and a suggestion that instead of lowering the tolerances provide better education on the standard. BRM's were scheduled for five standards under 5 year review.
